Artem S

Senior Full Stack Engineer

Poznan, Poland

Experienced in end to end software development more than 9+ years with fierce passion about web technology. Love implementing with others to build a creative, free-flowing and robust solution and deliver the best experience to users. Built more than 5 projects from small-size to large scale application. Skilled in problem-solving and debugging, looking for challenge.

➢ **Frontend**

- HTML5, CSS, Javascript, Typescript, JQuery
- Sass, Less, Bootstrap, TailWind CSS,
- React, Angular, Vue, Next.js
- React Native, Flutter
- Redux, Redux-toolkit, Mobx, RxJS, NgRx

➢ **Backend**

- Java, Spring, SpringBoot
- C#, Asp.net, Asp.net core, Entity Framework, Web API
- Python, Django
- Rest APIs, GraphQL
- MySQL, PostgresSQL, MongoDB, Microsoft SQL Server

➢ **Cloud Service**

- AWS S3, Lambda, EC2, EKS
- Azure, GCP

➢ **DevOps/Testing**

- Agile/Scrum/Kanban methodology
- Git, GitHub, GitLab, BitBucket
- Docker, Kubernetes, Jenkins, CI/CD
- TDD, BDD
- Jest, Mocha, Testing library, Cypress, Selenium, xUnit, NUnit

➢ **Soft skills**

- Jira, Asana, Trello, Clickup, Notion
- Teamwork, Mentorship, Communication Skills

WORK EXPERIENCE

Healthcare Logic - (Full Stack Engineer)

Oct 2021 - Aug 2024

- Produced 3 projects including web and mobile applications with SpringBoot + React, SpringBoot + Angular in Scrum and Kanban environment.
- Expert in Spring Boot security practices, implemented OAuth2 authentication and role-based authorization, minimizing vulnerabilities and ensuring secure user access.
- Completed new features, and state management by RxJS and NgRx into a complex Angular project result 10% more users upgrading the membership.
- Optimized Java 8+ features in Spring Boot application, achieving 25% reduction in resource utilization and improved responsiveness.
- Implemented advanced methods for enterprise React applications, including component patterns, API and state management, performance optimization, and application layouts.
- Expert in Spring Boot; streamlined backend development processes, resulting in a 30% reduction in project delivery times and enhanced system stability.
- Experienced in building the presentation layer for complex data visualization using D3.js, Highcharts.js, and TailwindCSS.
- Expertise in Comprehensive Documentation (Technical Guides, API Documentation, User Manuals)
- Mentored 3 junior developers in a team through on-boarding process and pair programming session.

S-PRO - (Software Engineer)

Oct 2018 - Sep 2021

- Played an important role in building a fitness training platform, which involved gathering requirements from stakeholders, designing the solution, and implementing mock-ups into the real platform.
- Developed Infrastructure as Code (IaC) using AWS Cloud Development Kit (CDK) to automate and manage cloud resources, reducing deployment times by 40%.
- Created reusable components and libraries that can be leveraged across multiple projects, optimizing code performance in large-scale applications, ultimately reducing development time by 20%.
- Facilitated in Angular + ASP.Net project (Fitness and Wellness industry) and developed a testing plan and automated testing for the entire project, achieving a test coverage of over 90%.
- Analyzed and mitigated significant technical obstacles in real-time communication processes, achieving improved data transmission speeds by 30% and empowering the customer service team to handle 50% more queries daily.
- Led the implementation of OAuth and JWT for API security, which provided a scalable solution for managing access tokens and facilitated the onboarding of over 10 new development partners in 3 months.
- Utilized TypeScript for type-safe and efficient development.
- Contributed to the implementation of architecture in the Fitness and Wellness project, enhancing scalability and maintainability.
- Collaborated with DevOps teams to optimize CI/CD pipelines, integrating Docker and Kubernete for automated testing and deployment, reducing release cycles by 40%.

Plutora - Platform Engineer

Jan 2016 - Aug 2018

- Coordinated Agile training workshops for 30+ team members, which increased understanding of Scrum principles and practices; boosted team productivity by 20% within the first three months of implementation.
- Crafted an automated API integration framework utilizing Clarity, Git, QTest, and Jira, streamlining the development process and enabling a 25% faster deployment cycle, leading to quicker feature releases.
- Solid understanding of web technologies such as REST, HTTP/2, and JSON.
- Deployed projects on AWS EC2 instances using Nginx, and PM2.
- Launched a specialized Chrome extension that empowered developers to visualize state transitions, leading to a 25% reduction in onboarding time for new team members adapting to the state-management framework.
- Managed API development, SEO, custom email templates, and social integration.

EDUCATION

University of Porto - Bachelor of Computer Science

2011 - 2015
