Thomas L█████

Senior Full Stack Developer

- Copenhagen, Denmark

Summary

With over 7 years of comprehensive experience in both web and mobile application development, I am a seasoned full-stack engineer specializing in React, Django, and Spring Boot. My expertise extends beyond coding; I have a solid background in UX design, enabling me to create visually stunning and user-friendly interfaces. Throughout my career, I have successfully led the development of innovative applications in diverse industries such as banking, healthcare, e-commerce, and security. My focus on best practices in accessibility and maintainability ensures that every solution I deliver is not only robust but also scalable and sustainable. I thrive in dynamic environments and am passionate about transforming complex challenges into seamless digital experiences.

Experience

CuddlyNest
Barcelona, Spain

Full Stack Developer
02/2022 - 09/2024

- Spearheaded the translation of complex Figma designs into modular, scalable UI/UX components using React, TypeScript, and Tamagui, ensuring a consistent and intuitive user interface across the entire application
- Maintained a unified cross-platform monorepo utilizing Expo and Next.js, delivering consistent UI/UX experiences across iOS, Android, and web platforms through React Native and Tamagui
- Designed RESTful APIs to facilitate data exchange between the client and server, optimizing performance and scalability for high-traffic applications
- Collaborated with cross-functional teams including UX/UI designers and QA engineers to gather requirements, troubleshoot issues, and deliver features that meet user needs effectively
- Utilized Agile methodologies to manage project timelines and deliverables, ensuring timely releases and continuous integration of new features

Shpock
Vienna, Austria

Frontend Developer
05/2020 - 02/2022

- Played a pivotal role in requirements analysis and design, ensuring a deep understanding of technical requirements and contributing to flawless implementation
- Developed responsive web applications using React and Next.js, while also creating robust cross-platform mobile applications with React Native to deliver high-quality user experiences on both iOS and Android
- Integrated various third-party services, including Firebase, Stripe, and social login functionalities, to enhance application capabilities and streamline user interactions
- Championed the implementation of new features and optimizations, meticulously addressing user feedback to elevate app functionality and user satisfaction
- Revamped a legacy codebase for a web application, transforming it into a clean and maintainable project, significantly improving development efficiency and reducing technical debt

Leavy.co
Paris, France

Backend Developer
08/2017 - 02/2020

- Designed and implemented robust server-side applications using Python and Java Spring Boot, ensuring efficient data handling and seamless integration with front-end technologies
- Developed RESTful APIs and microservices architecture to support scalable applications, optimizing performance and enabling independent module deployment
- Managed database design and optimization using MongoDB and PostgreSQL, enhancing data retrieval speeds and maintaining data integrity across multiple applications
- Implemented authentication and authorization protocols, such as OAuth and JWT, to secure APIs and protect sensitive user information
- Monitored and optimized application performance through logging and analytics tools, proactively identifying and resolving bottlenecks
- Actively contributed to the open-source community, advocating for and implementing essential software fixes

Skills

React, React Native, NextJS, Expo, VueJS, Flutter, JavaScript, TypeScript, Node, Express, Material UI, Python, Django, Java, Spring Boot, Flask, Firebase, MongoDB, MySQL, PostgreSQL, SanityCMS, Docker, Kubernetes, AWS, Azure, GCP, Git

Education

Aalborg University
Aalborg, DK

Bachelor's in Computer Science
09/2014 - 06/2017
